

## What's Under Them?

UNDER each finger is a little greenish kernel. Each of these represents a special type of a certain kind of coffee. Millions are wondering just what these coffees are, because they constitute the secret of the famous La Touraine Formula. The formula is known only to a handful of men, who regard it as a priceless possession. According to this formula they select from the thousands of coffees in the world's markets, just the types and kinds required for La Touraine. They blend these coffees by an exact standard it has taken us years to perfect. They roast them with a skill and knowledge born of lifelong devotion to coffee-quality. The result is a flavor, an

aroma, a full-bodied coffee-goodness that has made La Touraine Coffee the accepted standard for New England.

Get fresh-roasted La Touraine today. Your grocer sells it. Buy it in the bean, and have the grocer grind it for you. Coffee preserves its freshness and essence much longer in the bean.

Do not accept La Touraine unless it is in the La Touraine Package.

### Try Instant La Touraine
